EDUCATION

Virginia Tech

Expected May 2028

B.S. in Computational Modeling & Data Analytics | GPA: 3.8

- **Languages:** Python, Java, C, C#, SQL, MATLAB **Tools:** Azure Cloud, Linux, LLVM, Git
- **Courses:** Data Structures & Algorithms, Object-Oriented Programming, Low-Level Programming, Linear Algebra, Discrete Math, Multivariable Calculus, Probability & Statistics

WORK EXPERIENCE

Incoming Student Data Analyst

2026 – 2027 Season

Virginia Tech Baseball

Blacksburg, VA

- Selected to join the Virginia Tech Baseball Analytics staff, supporting **TrackMan** and in-game data analysis for player evaluation and pitching analysis.
- Will assist with player performance reports and visualizations for coaches and athletes, and contribute to opponent scouting workflows using **R** and **SQL**.

AI & Data Science Intern

Aug. 2025 – Dec. 2025

South Asian Business Council of Virginia

Ashburn, VA

- Led a **5-member team** building an AI-powered receptionist system for **25 local businesses**, automating phone scheduling, appointment booking, and email confirmations.
- Built voice-to-text and AI response pipelines integrated with **Azure SQL Database** and **n8n** workflow automation, cutting manual scheduling workload by **60%** during pilot testing.
- Designed a **Retrieval-Augmented Generation (RAG)** workflow to improve response accuracy and support reuse across multiple business configurations.

Founder & Co-President

Sep. 2022 – Jun. 2025

StudentCoders of Virginia

Ashburn, VA

- Co-founded a nonprofit that reached **250+ students** across Northern Virginia through workshops, mentoring, and community coding events focused on underserved youth.
- Built and taught a beginner **Python** curriculum covering logic, conditionals, loops, functions, and project-based coding for students with no prior programming experience.
- Recruited and managed **15+ student volunteers** across teaching, mentoring, and logistics roles for **20+ workshops and sessions**.

Federal Technology & Contracts Intern

Sep. 2024 – Jan. 2025

Applied Federal Technologies

Ashburn, VA

- Screened **500+** public federal contract listings across cloud computing, cybersecurity, AI/ML, data engineering, and IT modernization to identify high-fit opportunities.
- Tracked **100+** qualified RFIs, RFPs, and Sources Sought notices using structured pipeline spreadsheets logging deadlines, NAICS codes, agency contacts, and status.
- Reviewed procurement requirements for **40+ agencies** and mapped findings to company capabilities to help prioritize active opportunities.
- Researched **10 target agencies**, profiled incumbent contractors and teaming partners, and contributed to capability statement drafts and outreach packages.

Student Researcher

Aug. 2022 – Mar. 2023

NASA HUNCH Program

- Designed and iterated on a lunar rover wheel prototype for Moon surface operations, presenting the final design to engineers at NASA Langley Research Center.

PROJECTS

AI Stock Trading Assistant | Python, Azure AI Foundry, C#, MATLAB, Pandas, NLP

Apr. 2026

- Parsed SEC 10-Q filings and financial news using BeautifulSoup and the SEC EDGAR API to build a structured data pipeline for downstream analysis.
- Developed an NLP pipeline using embeddings and GPT-based classification to analyze market sentiment and generate experimental buy/sell signals.

LLVM IR Analyzer | LLVM API, Clang (In Progress)

2026

- Exploring LLVM front-end tooling to generate and inspect IR; studying compiler optimization fundamentals using Clang.
